

## **Release Notes for DrayTek Vigor 2930 series (UK/Ireland)**

Firmware Version	3.3.2.1 (Formal Release)
Release Type	<b>Critical</b> – Upgrade recommended immediately
Build Date	16th December 2016
Release Date	17th January 2017
Revision	61357
Applicable Models	Vigor 2930 series
Locale	UK & Ireland Only

### **New Features**

(None)

### **Improvements**

1. Security improvements including one or more considered critical.

### **Known Issues**

(None)

---

### **Firmware File Types**

The ZIP file contains the firmware with two different file extensions, .ALL and .RST. The firmware is identical but the RST file contains factory default settings. If you install the ALL file, your router will retain all existing settings. If you use the RST file, all settings will be wiped from your router.

### **Upgrade Instructions**

It is recommended that you take a configuration backup prior to upgrading the firmware. This can be done from the router's system maintenance menu.

To upgrade firmware, select '*firmware upgrade*' from the router's system maintenance menu and select the correct file. Ensure that you select the ALL file unless you want to wipe out your router's settings back to factory default.

### **Manual Upgrade**

If you cannot access the router's menu, you can put the router into 'TFTP' mode by holding the RESET whilst turning the unit on and then use the Firmware Utility. That will enable TFTP mode. TFTP mode is indicated by all LEDs flashing. This mode will also be automatically enabled by the router if there is a firmware/settings abnormality. Upgrading from the web interface is easier and recommended – this manual mode is only needed if the web interface is inaccessible.

---

Firmware Version	3.3.2
Release Date	27th April 2015
Build Date	30th March 2015
Applicable Models	Vigor 2930 series

#### **New Features**

(None)

#### **Improvement**

1. SSL3 now disabled in favour of TLS by default for SSL tunnels and web management.
2. The router's TCP SYN attack protection has been improved.

Firmware Version	3.3.1.2
Release Date	24th July 2014
Build Date	11th July 2014
Applicable Models	Vigor 2930 series

#### **New Features**

(None)

#### **Improvement**

1. Corrected CVE-2014-0224 CCS injection vulnerability.

Firmware Version	3.3.1.1
Release Date	23rd August 2012
Build Date	16th August 2012
Applicable Models	Vigor 2930 series

#### **New Features**

1. Support Oray Peanuthull DDNS.

#### **Improvement**

1. WCF updated due to change of portal to myvigor.draytek.com from www.vigorpro.com
2. Improvements to VPN Profile IPSec subnet and mask section

Firmware Version	3.3.1
Release Date	28th March 2012
Build Date	23rd February 2012
Applicable Models	Vigor 2930 series

### **New Features**

1. Support added for simple authentication and Microsoft Active Directory LDAP search requests
2. Support added for 2048-bit Private key Local Certificate Generate Request.

### **Improvement**

1. More TR-069 parameters added for VigorACS SI.
2. Corrected an issue that could occur for PPPoE connections
3. IMP2P signatures improved for CSM.
4. SSL Tunnel now supports 64-bit Windows
5. SSL RDP Application now supports full screen mode
6. SSL RDP Application now supports Vista/Win7/Win2008
7. IPSEC Phase 1 proposal now supports DH Group 5; IPSEC Phase 2 now supports AES128, AES 192, AES 256
8. Auto-reboot command added to telnet interface
9. IPSEC X.509 Phase 1 re-key issue with Cisco routers resolved
10. RADIUS authentication via VPN tunnel issue resolved
11. VPN Load-Balance issue resolved

Firmware Version	3.3.0
Release Date	24th August 2010
Build Date	23rd August 2010
Applicable Models	Vigor 2930 series

#### **New Features**

1. Supports GlobalView Web Content Filter
2. Supports Web Authentication

#### **Improvement**

1. Corrected: WAN2 did not work correctly when in PPPoE mode
2. Corrected: Resolved a reboot issue which would occur when the "prevent web access from IP address" option in CSM>URL Content Filter is enabled.

Firmware Version	3.2.4.1
Release Date	15th June 2010
Build Date	7th May 2010
Applicable Models	Vigor 2930 series

#### **New Features**

1. Added mOTP support for VPN authentication
2. Compliant with VigorACS SI
3. SSL VPN users can now use a Java Applet to create the VPN tunnel

#### **Improvement**

1. Corrected: Resolved an issue with Load balancing for WAN connections.

Firmware Version	3.2.3
Release Date	24th November, 2009
Build Date	27th July, 2009
Applicable Models	Vigor 2930 series

#### **New Features**

1. Add telnet command "ip arp accept" for DHCP connection with some ISPs.
2. Add TCP/UDP option into Open Port
3. Add warning message setting for session limit.
4. Add WAN MTU and WAN detect TTL settings in Web UI.
5. Add telnet command "wan detect wan1/wan2 timeout" for WAN detection timeout.

#### **Improvements**

1. Corrected: Change the word "Wireless Advertisement" into "Web Portal Login" on Web UI.

Firmware Version	3.2.1
Release Date	August 28, 2008
Applicable Models	Vigor 2930 series

#### **New Features**

1. Support VPN backup and VPN load balance features
2. Support L2TP WAN connections
3. New VPN setup wizard
4. Add WEB UI for CPU usage and memory usage

#### **Improvement**

1. Corrected: VPN remote dial in not work in IP unnumbered environments.
2. Corrected: IPSec and X.509 Stability improvement
3. Support individual DNS server for WAN and LAN.

Firmware Version	3.2.0
Release Date	May 8, 2008
Applicable Models	Vigor 2930 series

### **New Functions**

1. Support SSL VPN function: Web Proxy and Tunnel mode
2. Support 802.1x for Wireless LAN
3. Add new DynDNS Provider: TwoDNS

### **Improvement**

1. Add more application types for CSM
2. Fix WAN2 IP alias NAT loopback issue

Firmware Version	3.1.0
Release Date	Mar 19, 2008
Applied Models	Vigor 2930 series

### **New Functions**

1. CSM (Content Security Management) V2, support advance IM/P2P/Application content management.
2. Support TR069 management to work with DrayTek ACS Server.
3. Wireless support WPS (Wi-Fi Protected Setup).
4. "Factory Reset" button: Press once to start WPS, twice to enable or disable WLAN.
5. Bandwidth limit support IP group limit and residual bandwidth utilization.
6. Show Netbios Name in dataflow monitor and arp table.
7. Mapping ISDN S0 MSN to Sip accounts
8. Support ISDN-S0 MSN alias

### **Improvement**

1. Wireless fix Intel client throughput issue.

Firmware Version	3.0.3
Release Date	January 02, 2008
Applied Models	Vigor 2930 series

#### **New Features**

1. Support wireless 802.11n.

Firmware Version	3.0.2
Release Date	Oct 23, 2007
Applied Models	Vigor2930 series

### **New Features**

1. Add VoIP call barring function.
2. Add VoIP regional function.
3. Add WAN2 IP alias support.
4. Syslog and mail alert support domain name.
5. Add new DDNS (3322 and Zoneedit)
6. ISDN NT port can accept incoming data call.
7. Add ISDN default call route detection and ISDN network reminder.
8. Add ISDN CLIR/ CLIP.
9. Add ISDN Point to Point mode.
10. Add ISDN TE to NT port Transparent MSN function.
11. Add NT port MSN to sip account mapping.
12. ISDN phone can show Router system time.

### **Improvement**

1. Improve internal call and loop-through call performance.
2. Fix some ISDN phone can't do on-hook dial issue.

Firmware Version	3.0.1.3 (first release for the product new launch)
Release Date	September 10, 2007
Applied Models	Vigor2930 series

**First Firmware Release.**
