3. The ISP-issued DNS server and PPPoE status messages can be displayed on WAN Status page
4. Improvement to the DSL 35b synchronization where speed was too low
5. Description of the [LAN] > [IPv6] > Router Advertisement Configuration improved

### **Known Issues**

(None)

---

For more UK product details & specification, please visit <https://www.draytek.co.uk>

See <https://www.draytek.co.uk/support/product-knowledgebase> for Vigor 167 setup examples.

## **Firmware File Types**

The ZIP file contains the firmware with two different file extensions, .ALL and .RST. The firmware is identical, but the RST file contains factory default settings. If you install the ALL file, your modem will retain all existing settings. If you use the RST file, all settings will be wiped from your modem.

## **Upgrade Instructions**

It is recommended that you take a configuration backup prior to upgrading the firmware. This can be done from the modem's system maintenance menu.

To upgrade firmware, select '*Firmware*' from the modem's system maintenance menu and select the correct file. Ensure that you select the ALL file unless you want to wipe out your modem's settings back to factory default.

## **Manual Upgrade**

If you cannot access the modem's menu, you can put the modem into 'TFTP' mode by holding the RESET whilst turning the unit on and then use the Firmware Utility. That will enable TFTP mode. TFTP mode is indicated by all LEDs flashing. This mode will also be automatically enabled by the modem if there is a firmware/settings abnormality. Upgrading from the web interface is easier and recommended – this manual mode is only needed if the web interface is inaccessible.

---

Firmware Version	5.2.1 (Formal Release)
Release Type	<b>Regular</b> – Upgrade recommended when convenient
Build Date	29 <sup>th</sup> December 2022
Release Date	06 <sup>th</sup> February 2023
Revision	5.2.1, Web: 3.3.13-r3017.c90c04d, Core: r459
Applicable Models	Vigor 167
Modem Code	5.12.18.17
Locale	UK & Ireland Only

### **New Features**

(None)

### **Improvements**

1. Support for DNS server issued by ISP
2. Support for IPv6 Assignment Table / DNS Cache Table (IPv6)
3. LAN clients could lose access when IP group or objects were deleted while associated with access control list

5. The Outbound Default Action set to "Block" did not stop all outgoing traffic

### **Known Issues**

(None)

Firmware Version	5.1.2 (Formal Release)
Release Type	<b>Regular</b> – Upgrade recommended when convenient
Build Date	19 <sup>th</sup> August 2022
Release Date	23 <sup>rd</sup> September 2022
Revision	5.1.2, Web: 3.3.2, Core: DrayOS5_5
Applicable Models	Vigor 167
Modem Code	5.12.18.17
Locale	UK & Ireland Only

### **New Features**

(None)

### **Improvements**

1. Special characters - , % can be used for TR-069 username/password (router mode)
2. Special characters \ \_ @ . ( ) - / % are now supported for PPPoE credentials (router mode)
3. Fix for the packet loss issue
4. Improvements to VDSL compatibility with the vendor's serial number/version number information

### **Known Issues**

(None)

Firmware Version	5.1.1 (Formal Release)
Release Type	<b>Initial Release</b>
Build Date	3 <sup>rd</sup> May 2022
Release Date	25 <sup>th</sup> May 2022
Revision	5.1.1, Web: 3.3.2, Core: DrayOS5_5
Applicable Models	Vigor 167
Modem Code	5.12.18.16
Locale	UK & Ireland Only
