## **Firmware File Types**

The ZIP file contains the firmware with two different file extensions, .ALL and .RST. The firmware is identical, but the RST file contains factory default settings. If you install the ALL file, your router will retain all existing settings. If you use the RST file, all settings will be wiped from your router.

## **Modem Codes**

There are five firmware variants available for download.

Download Filename	Firmware Filename	Modem Code	
		VDSL	ADSL
v2765_4321_BT.zip	v2765_4321BT_8D1B17.all	8D1B17	8D0E11
v2765_4321_MDM0.zip	v2765_4321_8B0F07.all	8B0F07	8B0701
v2765_4321_MDM1.zip	v2765_4321_8B1117.all	8B1117	8B0701
v2765_4321_MDM2.zip	v2765_4321_8D1917.all	8D1917	8D0C11
v2765_4321_MDM3.zip	v2765_4321_77C717.all	77C717	8D0C11

We recommend using firmware "v2765\_4321BT\_8D1B17.all" unless you have specific line issues.

## **Upgrade Instructions**

It is recommended that you take a configuration backup prior to upgrading the firmware. This can be done from the router's system maintenance menu.

To upgrade firmware, select '*firmware upgrade*' from the router's system maintenance menu and select the correct file. Ensure that you select the ALL file unless you want to wipe out your router's settings back to factory default.

## **Manual Upgrade**

If you cannot access the router's menu, you can put the router into 'TFTP' mode by holding the RESET whilst turning the unit on and then use the Firmware Utility. That will enable TFTP mode. TFTP mode is indicated by all LEDs flashing. This mode will also be automatically enabled by the router if there is a firmware/settings abnormality. Upgrading from the web interface is easier and recommended – this manual mode is only needed if the web interface is inaccessible.
